

The Self Funding Employers Association

Self Funding Employers Association, (Self Funding Association)

The Self Funding Employer Association also known as the Self Insurance Association and is the first national employer based non-profit trade association focused on self funded healthcare and workers compensation. Our goal is to create a coalition of self funded and self insured employers. With a focus on transparency in pricing for self funded plans including administrative fees, prescription drug fees (PBM fees), implementation and enrollment of Voluntary Benefits in the workplace.

The Self Funding Employer Association was created because thousands of employers self fund their healthcare plans, but there is not a trade association focused on employers where employers can openly, but privately discuss issues surrounding self funding their healthcare benefits. Many employers from both the private and public sectors do not know where to turn to find out how to implement self funded healthcare plans and which companies are the best service providers from TPA's, PBM's, Case Management and Disease Management Companies, PPO's and more. Many employers are also looking for new innovative ways to educate and enroll their employees in their self funding healthcare plans and wish to be prepared for any upcoming national legislation that may affect their self funded healthcare plans.

Our Mission

- To raise the awareness of the important benefits of self funding healthcare for employers, both private and public.
- To create transparency in Prescription Drug Management Fees (PBM Fees)
- To create transparency in all aspect of administrative fees.
- To provide one source of unbiased information regarding legal issues and other national issues that would affect self funded employers.
- To provide a reliable source of information, statistics and research data on Self Funding Healthcare and Workers Compensation for employers.
- To perform research and surveys in the area of self funded healthcare plans.
- For Group Purchasing which could reduce administrative and other costs for employer groups.
- To create a central point of "private" discussion for employers who have a self funding healthcare plan and for those employers who are interested in implementing a self funded healthcare plan.

Join the Self Funding Employers Association

Purpose: To provide a one authoritative source of information for employers in the self funding healthcare industry

The Self Funding Employers Association's purpose is to grow the Self Funding Industry in a positive direction and to facilitate knowledge transfer and networking opportunities for those in the industry.

Who does the Self Funding Employers Association (SFEA) represent?

We represent the employers who self fund their healthcare and workers compensation programs. One of the founders of the association was involved with purchasing benefits for one of the largest employers in the country.
